SunDEPLOYS™

SunCHECK™ Platform Implementation Support

SUN NUCLEAR corporation

Customizable and scalable to your clinical environment, SunDEPLOYS™ harnesses best practices from hundreds of SunCHECK™ Platform installations globally.

Applying proven processes, we design and manage implementation based on your team's priorities, workflow requirements and staffing realities. With SunDEPLOYS, you gain a team of experts focused on your SunCHECK success — from the start.

Our Process

- Project Management and Site Planning

- System Preparation

- Training and Go-Live Support

Whether you work within a single-linac site or network, and plan to use SunCHECK on the Cloud or through a local server, SunDEPLOYS is tailored to your needs.

From upfront requirements analysis and goal definition through clinical adoption, SunDEPLOYS is tailored to maximize the benefit of SunCHECK for immediate and long-term success.

Get Ready

Project Management and Site Planning

Your dedicated SunDEPLOYS team works side-by-side with you to ensure your clinical and operational goals are met, and your staff is confident in bringing SunCHECK into routine clinical use.

- Single point-of-contact for planning, scheduling, and coordination
- Customized rollout plans based on clinical and process goals/requirements
- Assistance with IT planning for server, infrastructure and technical inquiries
- SunCHECK Platform installation, system configuration and verification of communication between the software and on-site clinical systems

Get Set

System Preparation

A pre-training phase, System Preparation is focused on ensuring readiness at the time of on-site training and education.

Depending upon SunCHECK configuration, this includes:

- Beam model customization
- Assistance with EPID and Sun Nuclear device calibration
- Machine QA plan and QA template creation support

Go Clinical

Training and Go-Live Support

Your SunDEPLOYS team creates a site-specific training curriculum, ensuring confidence among all members of your team.

- On-site, end-user training based on functionality groupings (Patient and Machine), plus your clinical/operational goals
- Go-live support to ensure user proficiency, full clinical adoption and routine use of the targeted SunCHECK functionality

SunCHECK™

Used by 500+ Clinical Sites Worldwide
